

10. Federal Government Regional and Local Community Infrastructure Program Funding

The progress of Council's 29 projects under the Regional Local Community Infrastructure Program is by way of a regular report to Council. This report is the third in a series of project progress reports.

Acting Group Manager, Infrastructure Waste & Water

BACKGROUND

Following the announcement of funding approval for the projects and the engagement of coordinators to assist project delivery, Councillors requested regular progress reports.

10

At the Council meeting there will be a presentation available (including photographs) on the progress of each project. A status spreadsheet will also be available on the website for public information.

ISSUES

Asset

Significant changes are evident for a number of projects. The rock wall at Fishpen is mostly complete and has attracted a very positive community response.

CONCLUSION

The projects continue to enjoy enthusiastic community support and are proceeding largely on target. The first milestone report to our funding partner occurred at the end of May 2009 and has been accepted for payment.

20

RECOMMENDATION

That Council note the status report on the Regional Local Community Infrastructure Program projects.
